

PHP code execution results has been generated by an open source project
PHPPerformanceBenchmark.

The results for code snippet is below:

```
$value=array("abc","pqr","xyz");  
$name="name";  
$valueAry = array();  
$name1=explode("]", $name);  
$valueAry=array_fill_keys($name1,$value);
```

//please do not include any print echo statements here.
